Asslamualikum guys hope you are doing good I know we are still in Easter break and I scheduled a meeting last Wednesday which didn't happen because I had a meeting with the client and he made some changes. So this time I sat with him communicated everything and made the changes myself, but there are few bugs that needs to be debugged to get the system running.

Today, what time are you guys available for a quick meeting? I will explain you everything, and then once the issues are fixed, I think application will be ready to go by end of this Sprint, and then as per the milestone plan, we just need to get it ready for hosting.

Mon, Apr 6 at 2:07 PM
